

OUR EXPERIENCE

NEW ROYAL ADELAIDE HOSPITAL (NRAH)

As the largest infrastructure project in SA's history, building the new Royal Adelaide Hospital involves the removal of huge amounts of waste, in fact half a million tonnes of excavated concrete, asphalt, high level contaminated, low level contaminated, Intermediate Waste Soils and Waste Derived Fill.

With our depth of experience, world-class facilities and environmentally responsible approach to waste management, Stage 1 and 2 disposal and logistics of waste soils from the project site was awarded to Southern Waste ResourceCo.

By completion, the project will have seen in excess of 10,000 truck movements, with 10 to 40 trucks involved per day.

WASTE MANAGEMENT

Southern Waste ResourceCo is 1 of only 3 waste disposal companies in SA with approval to receive and dispose of low level contaminated waste.

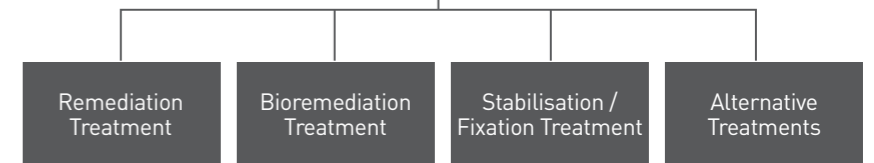

THE SERVICES WE OFFER

Southern Waste ResourceCo, through the scope of the ResourceCo Group of Companies, has the technical capability and appropriate accreditations to handle particular and difficult waste streams from waste validation, complete treatment and management options to re-use and final disposal of waste soil.

Services offered include:

1. STORAGE FACILITY
2. TESTING & REPORTING
3. FULL SOIL TREATMENT SERVICE

WASTE SOILS & RESIDUES

4. LOGISTICS SERVICES

Transport of contaminated materials by accredited EPA licensed vehicles.

WASTE TREATMENT EXPERIENCE

- Heavy metals (e.g. Arsenic, Lead)
- Total Petroleum Hydrocarbons
- Polycyclic Aromatic Hydrocarbons (e.g. Benzo(a)pyrene)

WORLD-CLASS FACILITIES

As a responsible global organisation, we believe we need to be a lot smarter about how we dispose of spent resources, minimising the impact of human activities on the environment.

With 3 locations, McLaren Vale, Tatchilla and Hartley, Southern Waste ResourceCo offers a full range of waste disposal solutions, from storage and treatment options to environmentally responsible 'end of life' disposals.

Southern Waste ResourceCo at McLaren Vale has constructed a dedicated state-of-the-art undercover soil treatment facility which:

- provides a full range of treatment options
- is all at one convenient location
- is capable of storing and treating the largest of remediation projects
- meets all EPA compliance requirements
- provides the best solution based on soil contamination

Southern Waste ResourceCo is 1 of only 2 sites in SA that have the waste treatment capabilities to receive and treat high level contaminated waste to enable disposal.
